National Infection Control and Blood Exposure Standards

Section 1. Infection Control and Safety Standards, adopted from the National Interstate Council of Cosmetology and Barbering (NIC).

(a) Wet disinfection and storage standards.

(i) Prior to use on any client, all non-porous tools and implements or multi-use items must be cleaned AND disinfected. Items must be cleaned with soap and warm water or a chemical cleaner. The items must then be disinfected by complete immersion in an EPA registered, bactericidal, virucidal, fungicidal (Formulated for Hospitals) disinfectant that is mixed and used according to the manufacturer's directions. **Note: Items that are porous are not able to be disinfected and must be disposed of after each use.**

(ii) Items MUST stay immersed or visibly moist with disinfectant for the entire contact time listed on the manufacturer's label to be effective.

(iii) All disinfectant solution must be changed per the manufacturer's label or sooner if contaminated.

(b) Dry storage standards.

(i) Disinfected implements must be stored in a disinfected, dry covered container and be isolated from contaminants. At no time can these items come into contact with used/dirty items.

(c) Hand washing.

(i) Thoroughly wash hands and the exposed portions of arms with soap and water before providing services to each client and after, smoking, drinking, eating, and using the restroom.

Section 2. Blood Exposure Procedure Standards, adopted from NIC.

(a) If a blood exposure should occur, the following steps must be followed:

(i) When possible injured party should go to a sink and rinse injury with running water and "milk" the injury if possible to remove any bacteria that may have entered the wound.

(ii) Supply injured party with antiseptic or single use packet of antibacterial ointment on the appropriate dressing to cover the injury.

(iii) Bag all blood-soiled (contaminated) porous articles and dispose of in trash. Immediately wash and disinfect all non-porous items (do not continue service with these items).

(b) The following is the responsibility of the candidate/student/licensee and should be executed as follows. Candidate, Student, Licensee injury.

(i) Protection – if a cut is sustained, stop the service, put on gloves (if appropriate) and clean the injured area;

(ii) Apply antiseptic to the injured area;

(iii) Dressing – cover the injury with the appropriate adhesive dressing;

(iv) Cover injured area with finger guard or glove if appropriate;

(v) Bag and dispose of all contaminated single use items;

(vi) Remove gloves and wash hands;

(vii) Clean model/client;

(viii) Clean and disinfect implements and station;

(ix) Clean hands; and

(x) Return to the service.

(c) Model/Client injury

(i) Stop service;

(ii) Glove hands of candidate/student/licensee;

(iii) Clean injured area;

(iv) Apply antiseptic;

(v) Cover the injury with the appropriate dressing to prevent further blood exposure;

(vi) Bag and dispose of all contaminated single use items;

(vii) Clean and disinfect any implements or surfaces contaminated;

(viii) Clean hands; and

(ix) Return to services.
